

Series 320-3106/05

Blackboard Ink, transparent

With the transparent blackboard ink Series 320-3106/05 a durable, resistant coating is created on suitable substrates which can be written on with chalk reversibly and in a long-term manner. Typically, the series is used to produce full-surface or partial labelling fields for promotional material in the catering sector and is characterised by its good acceptance of chalk and easy cleaning.

In coordination with the substrate and if implemented correctly, this system can also be used outdoors without difficulty.

Due to the transparency, there are - compared to the colored blackboard inks - no restrictions in the design of the product layout, which opens completely new application possibilities.

Specifications

Thinner	Series 300-017
Addition ratio	10-15 % by weight
Retarder	Series 300-018
Addition ratio	10-15 % by weight
Hardener	-
Addition ratio	-
Cleaner	Series 300-URS
Mesh	77.55 to 100.40
Drying	Jet / Air drying
Substrates	See Technical Data Sheet Series 320
Indoor / outdoor use	Primarily indoor use, temporary outdoor use
Further processing	Punching, cutting, embossing
Overprintability	-
Available quantities	1 kg, 5 kg
Shelf life	24 months
Others	Stir well before use.

Important information: Our technical advice whether spoken, written, or through test trials corresponds to our current knowledge to inform about our products and their use. This is not meant as an assurance for certain properties of the products nor their suitability for each application. You are, therefore, obliged to conduct your own tests with our supplied products to confirm their suitability for the desired process or purpose. The selection and testing of the ink for specific applications is exclusively your responsibility. Should, however, any liability claims arise, such claims shall be limited to the value of the goods delivered by us and utilized by you with respect to any and all damages not caused intentionally or by gross negligence.
