

Series 571-5106/05

Blackboard Ink, transparent

The UV screen printing varnish Series 571-5106/05 was specially developed for the classic application of offset finishing. On suitable substrates, a durable, resistant coating is created which can be written on with chalk reversibly and in a long-term manner. Typically, the series is used to produce full-surface or partial labelling fields for promotional material in the catering sector and is characterised by its good acceptance of chalk and easy cleaning.

Due to the transparency, there are - compared to the colored blackboard inks - no restrictions in the design of the product layout, which opens completely new application possibilities.

Specifications

Thinner	Series 500-017
Addition ratio	5 % (as required)
Retarder	-
Addition ratio	-
Hardener	-
Addition ratio	-
Cleaner	Series 500-URS
Mesh	77.55
Curing	350 mJ/cm ² Technigraf (depending on the substrate)
Substrates	Offset printed paper and cardboard as well as various laminates
Indoor / outdoor use	Indoor
Futher processing	Cutting
Overprintability	Possible with UV systems after preliminary testing
Available quantities	1 kg, 5 kg
Shelf life	12 months
Others	-
