

Series 300-017

Universal thinner, slow

Thinners, accelerators and retarders are used to adapt printing inks to the requirements of different applications.

Interpretation of the evaporation number: The evaporation number indicates how quickly a solvent evaporates. For example, the evaporation number 112 means that the thinner evaporates 112 times slower than Ethyl ether (evaporation number 1).

Specifications

Evaporation number	112
Delivery conditions	1 l, 5 l, 25 l
Shelf life	12 months
Others	Stir well before use.

Important information: Our technical advice, whether spoken, written, or through test trials, corresponds to our current knowledge to inform about our products and their use. This is not meant as an assurance for certain properties of the products nor their suitability for each application. You are, therefore, obliged to conduct your own tests with our supplied products to confirm their suitability for the desired process or purpose. The selection and testing of the ink for specific applications is exclusively your responsibility. Should, however, any liability claims arise, such claims shall be limited to the value of the goods delivered by us and utilized by you with respect to any damages not caused intentionally or by gross negligence.
